8. The Fameone Team

1. Introduction

1.1. What is Fameone?

Fameone is a new online platform that connects models, photographers, stylists and clients from all over the world on a single platform. Models and photographers can present themselves on Fameone with their own profile, while clients can filter from this large number of members according to a wide range of criteria in order to book them for upcoming projects. In addition to clients, all members can book each other on Fameone. Say for example, a photographer may engage a model for a scheduled shoot, or a model may hire a photographer to obtain e.g. professional portrait shots of herself.

Another highlight for members of Fameone is the possibility to offer licenses for their own photo and video material in their profiles for sale. This allows models to monetize their own shooting photos (portraits, beauty, fashion, etc.) as well as photographers can monetize their whole photo material (portraits of models, fashion, art, wildlife, landscape, etc.).

Fameone offers professional models, photographers and stylists a platform to present themselves to the public, while newcomers also get an easy entry into the modeling and photography industry and are no longer dependent on agencies or intermediaries. So now everyone has the possibility to market themselves with just a few clicks on Fameone directly.

1.2. Blockchain-Based Platform

The Fameone platform is based on blockchain technology and utilizes FAME tokens in conjunction with smart contracts to store the booking contracts between all members in the blockchain. Furthermore, the acquired licenses of purchasers of photo and video material from models or photographers are also stored in the same way as the booking contracts. The FAME token is thus a fully integrated form of payment on the Fameone platform and fulfills a basic function.

However, members of Fameone do not need to be familiar with crypto currencies, as they can pay in addition to the FAME token with common payment methods. In order to secure trading of the FAME token on exchanges, even when alternative payment methods are used by our members, the FAME token will be traded in full on the full revenues from the booking commissions and license sales in a background process via Fameone's API connections to exchanges.

Due to the planned international marketing campaigns and the resulting increase in number of members and transactions on the Fameone platform, an increasing trading volume of the FAME token is guaranteed. In accordance with the principles of trading volume interpretation, a continuously rising volume of trades is an indicator for the increase in value of shares or tokens. Given the projection of these principles into the increasing trading volume of the FAME token, an uptrend in the value of the FAME token can be predicted.

2. Marketing

2.1. Execution of Expansion

In order to promote and establish Fameone as a central platform in the modeling and photography industry, a swift, global expansion is planned. This goal is to be achieved with the proceeds from the ICO through international multichannel marketing campaigns, starting from advertising on social networks via paid search right up to video ads and commercials on TV, based on the amount of the proceeds. In addition, Fameone will employ its own scouts, which will acquire new members and talents via social networks such as Facebook, Instagram, LinkedIn, etc.

2.2. Marketing Channels

Fameone Scouts	Fameone will employ its own scouts, which will acquire new members and talents via social networks like Facebook, Instagram, LinkedIn, etc.
Social Media Platforms	Target group oriented advertising on social media platforms like Facebook, Instagram, Twitter, etc.
Websites / Blogs	Advertising on specific websites and blogs with target group visitors of Models, Photographers, Stylists and Clients
Paid Search	Keyword optimized paid search advertising on search engines such as Google, Bing, Yahoo, Baidu, Yandex, etc.
Print Media	Advertising in magazines that are aimed at Models, Photographers and Stylists
Video-Ads	Keyword optimized advertising on video platforms such as YouTube, Vimeo, etc.
TV-Spots	Commercials on TV

2.3. Marketing Campaigns 2019

Fameone is to be established through international marketing campaigns as a central platform in the global modeling and photography industry. To this end, in 2019 global marketing campaigns will be carried out in more than 35 countries via the marketing channels from the aforementioned table (2.2. Marketing Channels).

Marketing Campaigns 2019

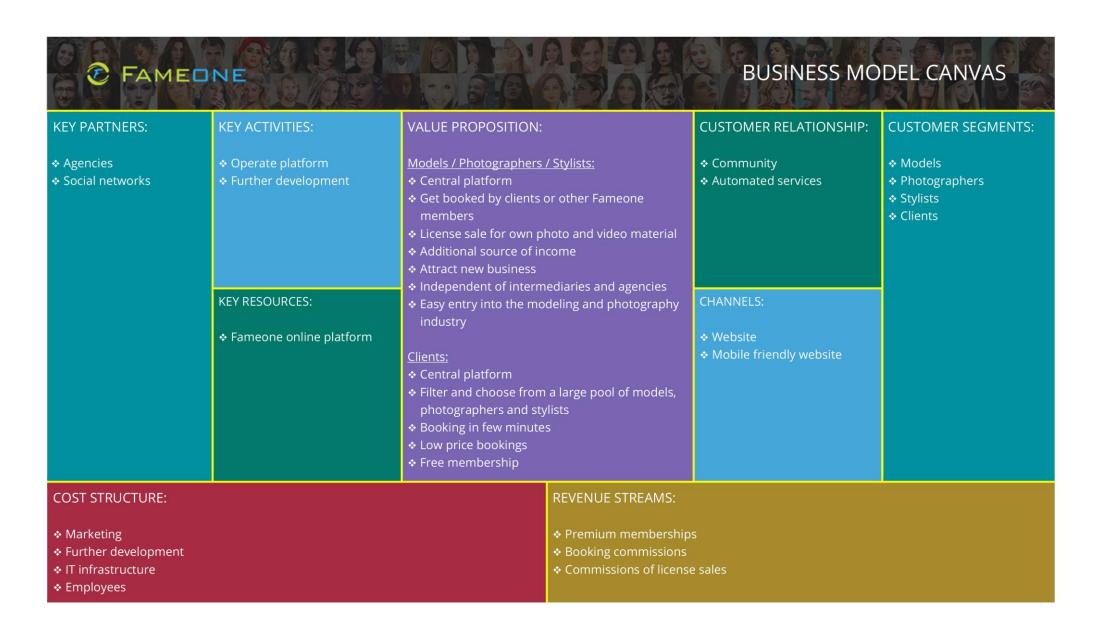

Quarter	Marketing campaign countries	Potential new members
01 Q1 2019	Germany, Austria, Switzerland, France, Netherlands, Belgium, Spain, Great Britain, Poland, Czech Republic, Portugal, Ireland, Norway, Finland, Estonia, Denmark, Sweden, Italy, Iceland, Latvia, Lithuania, Slovakia, Hungary, Slovenia, Croatia	950,000
02 Q2 2019	United States, Canada, Mexico, Brazil, Argentina	1,400,000
03 Q3 2019	Russia, Belarus, Ukraine	350,000
04 Q4 2019	China, Japan, Australia	2,700,000
= Q1-Q4 2019	Marketing campaigns in more than 35 countries	5,400,000

2.4. Marketing Map

6.3 Overview of Account

6.4 Premium memberships for extended functionality

7. Exchanges

Fameone will strive to provide as many diverse opportunities for users to purchase or sell FAME tokens. We will actively engage in partnerships with both centralized and decentralized exchanges. When looking for partner exchanges, we will apply the criteria of legal fit as well as acceptable commercial conditions. The reach out to exchanges will be done prior to the token sale event, however, due to the nature of business practices of exchanges, any announcements can only be made after the token sale has finished. The Fameone team can announce and talk about the exchanges only after the official confirmation of both sides (this is suggested by legal partners and exchanges). Exchanges are partners of Fameone in terms of that they enable users of Fameone to exchange their FAME tokens.

8. The Fameone Team

Peter Demko

Founder & CEO

Peter has more than 14 years of experience in company management, software and web development and is an early investor in the crypto market since 2011.

Skills

Front-/Back-End Web Development CGI/Perl C++ Project Management
